

# The Tuareg named sons of the wind.

17° of Latitude / 7° of Longitude

Aman iman - Water is life

For the Tuareg, the architecture of the deserts is like a book showing them the coming weather, reading in the forms of the dunes.

During their travelling through the desert, they are looking to the stars, but also to old rock formations, edges of dunes, and pictures of sand to find the direction of the wind, to see the coming storm in good time.
